TWO TO TRY

SKIN CARE HAUTE SPOTS

» Valentina Hernandez Botero founded **Sana Skin Studio** to embody the philosophy that everyone can become their own skin healer. At Sana, which recently opened in West Palm Beach, the facials on offer are rooted in education and powered by clean, toxin-free skin care, with each one customized to an individual's unique needs and goals. "We believe skin is a reflection of our journey—it's not always perfect and we're okay with that," says Botero. "Our monthly Skin Memberships provide a consistent support system to guide you on your skin journey. Getting monthly facials is the best way to maintain your skin and work toward your skin goals." (sanaskinstudio.com)

» **Sisley Paris** has debuted a new boutique in Palm Beach's Esplanade. In addition to an array of phyto cosmetology products, the boutique includes a treatment room where customers can experience services such as the Black Rose Radiance and Sisleya anti-aging facials. "Every person who enters one of our maisons is fully immersed in the Sisley universe," says Jim Maki, president of Sisley Paris USA. "They will be able to experience all the brand's axes with our expertly trained aestheticians and professionals—skin care treatments, fragrance, makeup applications and services, and hair services with stylists."
